(a) Collusion runs vs all-honest controls (higher is better)
Qwen Core (their protocol)
Qwen Transfer (zero-shot)
Gemma Core (their protocol)
Gemma: warned of a monitor
Gemma: told to hide it
Gemma: paraphrased
Gemma: paraphrased, no channel
Overlap monitor (ours, untrained)
NARCBench probe (trained; Deception Split)
(b) Collusion vs a harmless shared note
Core collusion vs cite-evidence note
Cite-evidence note
Budget note
Deadline note
Same note, given openly
Harmless note vs controls: false alarms (lower is better)
